| | | | | | | | | | | ) because Sequelize needs to treat this situation differently (for example, using other symbol escaping approaches). | | |
| 4 | 7d7cd5e3-3e6c-42f6-b99d-0d252095f998 | Testing again | 0 | 0 | 0 | 0 | | 0 | 30 | Bind parameters are like replacements. Except replacements are escaped and inserted into the query by sequelize before the query is sent to the database, while bind parameters are sent to the database outside the SQL query text. A query can have either bind parameters or replacements. Bind parameters are referred to by either $1, $2, … (numeric) or $key (alpha-numeric). This is independent of the dialect. | 2021-04-22 12:22:54 | 2021-04-22 12:22:54 |
